2.Position:Automation Testing

Location:Gurgaon

Experience:10-15 years

Job description:

Hello Connections!!!

Would you be interested in a career in #AutomationTesting with a Leading Telecommunications Company in India? It is WFH at the moment but later you'd have to relocate to either Mumbai/Bangalore/Hyderabad/Pune/Gurgaon(whichever you prefer)

o Extensive (10-15 years) experience working as #SDETArchitect with hands on test development background with 5+ years of experience in a technical lead or similar role, leading test automation

development efforts.Salary will be best in industry. Looking for candidates from product based companies.

The following skills are must- have for this role.

o Deep experience and knowledge of distributed event-driven systems using #microservicesarchitecture.

o Hands on experience with #BDD/ #Cucumberframeworksautomation. (MUST)

o Working knowledge of the technical stacks and practices used in modern distributed architecture systems. Understanding of implementation and deployment architecture of such systems.

o Extensive daily experience in writing clean and solid code in any modern languages: #Java (preferred), #Kotlin, #JS

o Strong working knowledge and understanding of different types of APIs (example: #HTTP, #JSON, #REST, #XML, #SOAP, #sync/ #async, #OpenAPI #spec, etc.

o Extensive experience in #APItestautomation & #UItestautomation:

▪API test automation: Hands on experience with API test automation

tools, like #Postman, #REST-assured, #Karate etc.

▪UI test Automation: Hands on experience with UI test automation

tools, like #SeleniumWebDriver, #Appium, etc.

o Experience in developing, enhancing and maintaining custom test automation frameworks.

o Experience in using application life cycle management like Azure DevOps, JIRA, Jenkins.

o Good Experience and knowledge of design, code, debug, deploy and maintenance.

o Azure exposure or knowledge will be nice to have.

o Strong understanding, knowledge of software development and testing life cycle and process.

o Experience with non-functional testing (NFTs) such as Performance, Load, #Scalability, #Chaos/ #Resiliency, #Security testing etc. You may/may not be a SME on any of these.

o Experience working with cross functional teams, dev managers and all the stake holders for the integration and end to end testing.

o Extensive experience in Agile ways of working.

Interested candidates kindly send their resume on anita@wehirewise.com
